THE GREAT DISASTER.

After the Calamity.

As a natural consequence the all-natural-grandeur of the ladies formed the idea of a grand tour of inspection of the different sections of the line. They attempted to do this on the evening of Aug. 14, but before they reached the place where the train was halted, they were met by a storm of such violence that they were compelled to return to their cars. They found that the train was in the possession of the engineers, who were attempting to make repairs on the track. They were informed that the train would be delayed for several hours, and that they would have to make the tour on foot. They decided to make the tour on foot, and they proceeded to the place where the train was halted.

The grass was green and would not burn close to the bridge, but the grass was burned clear inside of the rail. The other was not in the grass and would not burn close to the bridge, but the grass was burned clear inside of the rail. The other was not in the grass and would not burn close to the bridge, but the grass was burned clear inside of the rail. The other was not in the grass and would not burn close to the bridge, but the grass was burned clear inside of the rail.

The ties that were turning were on the south side of the track. They were turned by the tread of the wheels and by the action of the ballast. The ties that were turning were on the south side of the track. They were turned by the tread of the wheels and by the action of the ballast.
